## PROJECT

### "Hospital Management System"

**2025**

The Hospital Management System (HMS) is a comprehensive, web-based solution designed to streamline and automate the day-to-day operations of a healthcare facility. The system integrates multiple departments, including patient registration appointment scheduling, billing, and staff information, ensuring improved efficiency, accuracy, and communication within the hospital. The primary goal of HMS is to enhance patient care and operational efficiency by reducing manual processes, minimizing errors, and optimizing resource allocation.
